VOLUME 39 SECOND SERIES

CONTENTS

JANUARY 1, 1932

X-ray Wave-Lengths by the Dispersion in Quartz – J. A. BEARDEN 1
Spectra of Two and Three-Valence-Electron Atoms, Si II, P III, S IV, Si III, P IV and S V – I. S. BOWEN 8
Red CN Band System – F. A. JENKINS, YALE K. ROOTS AND ROBERT S. MULLIKEN 16
Broad Lines in the Arc Spectrum of Copper – C. W. ALLEN 42
Intensity of Quartet Lines in the Arc Spectrum of Copper – C. W. ALLEN 55
Absorption of Infrared Radiation by Small Particles – A. H. PFUND AND S. SILVERMAN 64
Concerning the Absorption and Reflection Spectra of Calcite in the Infrared – S. SILVERMAN 72
Infrared Absorption Bands of Water Vapor – E. K. PLYLER 77
Near Infrared Absorption Spectrum of Methane – J. G. MOORHEAD 83
Magnetic Rotation Spectrum and Heat of Dissociation of the Potassium Molecule – F. W. LOOMIS AND R. E. NUSBAUM 89
Photoelectric and Thermionic Properties of Palladium – LEE A. DUBRIDGE AND W. W. ROEHR 99
Further Experimental Test of Fowler's Theory of Photoelectric Emission – LEE A. DUBRIDGE 108
Temperature Variation of the Magnetic Susceptibility, Gyromagnetic Ratio, and Heat Capacity in Sm^{+++} and Eu^{+++} – AMELIA FRANK 119
On the Evolution of a Rotationally Unstable Star – ROSS GUNN 130
Bands of CH and CN in Stellar Spectra – P. SWINGS AND O. STRUVE 142
Effect of Pressure on the Electrical Conductance of Salt Solutions in Water – W. A. ZISMAN 151
Letters to the Editor
Isotope Effects in Polyatomic Molecules – E. O. SALANT AND JENNEY E. ROSENTHAL 161
Vibrational Constants of the ICl Molecule – ORRELL DARBYSHIRE 162
Magnetic Properties of Nickel Colloids – CAROL G. MONTGOMERY 163
Hydrogen Isotope of Mass 2 – H. C. UREY, F. G. BRICKWEDDE AND G. M. MURPHY 164
Possible Narrowing of Compton Line Breadth by Preferentially Directed Electron Momenta in Ceylon Graphite – JESSE W. M. DUMOND 166
Production of Large Artificial Graphite Crystals – ALEXANDER GOETZ, ALFRED B. FOCKE AND ALFRED FAESSLER 168
Some Remarks on the Theory of Photoelectric Effect on Metals – IG. TAMM 170
Book Reviews – 173

PROCEEDINGS OF THE AMERICAN PHYSICAL SOCIETY

Chicago Meeting, November 27–28, 1931; Minutes and Abstracts 1–57; Author Index – 175

JANUARY 15, 1932

Variation in the Effective Lattice Constant of Crystals with Wave-Lengths – J. M. CORK 193
Theory of Complex Spectra, Part I. Energy Levels – M. H. JOHNSON, JR. 197
Beryllium Molecule – W. H. FURRY AND J. H. BARTLETT, JR. 210
Thermionic Emission and Space Charge – N. H. FRANK 226
Study of a Neon Discharge by Use of Collectors – CLIFTON G. FOUND AND IRVING LANGMUIR 237
Dissociation of Nitrogen and Carbon Monoxide by Electron Impact – JOHN T. TATE AND W. WALLACE LOZIER 254
Efficiences of Ionization and Ionization Potentials of Various Gases under Electron Impact – JOHN T. TATE AND P. T. SMITH 270
Zeeman Effect and Λ-Type and Spin Doubling in the CaH Bands – WILLIAM W. WATSON 278
Polarization of Mercury Resonance Radiation – L. LARRICK AND N. P. HEYDENBURG 289
Polarization of Resonance Radiation and Hyperfine Structure: The Cadmium Resonance Lines – A. ELLETT AND LEWIS LARRICK 294
Relative Efficiency of Some of the Mercury arc Lines in Exciting the Raman Spectrum of Benzol – SISTER MAGNA WERTH 299
On the Origin of the Solar System – ROSS GUNN 311
Possibilities in Relativistic Thermodynamics for Irreversible Processes without Exhaustion of Free Energy – RICHARD C. TOLMAN 320
Ferromagnetic Symposium and Conference at the Summer Meeting of the American Pnysical Society at Schenectady, September 12, 1931
On the Interpretation of Some Ferromagnetic Phenomena – FRANCIS BITTER 337
Some New Experimental Methods in Ferromagnetism – S. L. QUIMBY 345

Barkhausen Effect: Orientation of Magnetization in Elementary Domains — RICHARD M. BOZORTH 353
Further Experiments on the Propagation of Large Barkhausen Discontinuities — K. J. SIXTUS AND L. TONKS 357
Effect of Impurities on Ferromagnetism — T. D. YENSEN 358
Hydrogenized Iron — P. P. CIOFFI 363
Magnetization and Thermal e.m.f.'s — S. R. WILLIAMS 368
Magnetostrain and Magnetoresistance — L. W. MCKEEHAN 368
On the Verification of the Theory of Magnetization of Single Crystals — FRANCIS BITTER 371
Discussion of Papers by Messrs. Bozorth and Sixtus — 375
Discussion of Papers by Messrs. Yensen and Cioffi — 376
Discussion of Paper by Williams — 377

Letters to the Editor

Absorption of γ-Rays — ARTHUR BRAMLEY 378
Superconductivity with Respect to Alternating Currents — F. B. SILSBEE, R. B. SCOTT, J. W. COOK AND F. G. BRICKWEDDE 379
Spectrum of Carbon Dioxide. II. Electron Levels — H. D. SMYTH 380
Some Studies of Negative Point Discharges at Low Pressures — WILLI M. COHN 382
High-Speed Protons — M. A. TUVE, L. R. HAFSTAD, O. DAHL 384
On the Classification of Certain Lines of Radium — WALTER ALBERTSON 385
Molecular Beams of Salt Vapors — W. H. RODEBUSH AND W. F. HENRY 386

Book Reviews — 387

FEBRUARY 1, 1932

Further Experiments on the Uniformity of Distribution of the Cosmic Radiation — ROBERT A. MILLIKAN 391
Cosmic-Ray Ionization and Electroscope-Constants as a Function of Pressure — ROBERT A. MILLIKAN 397
On an Attempt to Deflect Magnetically the Cosmic-Ray Corpuscles — L. M. MOTT-SMITH 403
Perturbed Series in Lines Spectra — A. G. SHENSTONE AND H. N. RUSSELL 415
Wave Mechanics of Radiation and Free Particles — E. H. KENNARD 435
Local Momentum in Wave Mechanics. II — LLOYD A. YOUNG 455
First Spark Spectrum of Caesium (Cs II) — O. LAPORTE, G. R. MILLER, AND R. A. SAWYER 458
Theory of the Excitation of Atomic Mercury by Electron Impact — W. G. PENNEY 467
Shot Effect in Space Charge Limited Currents — E. W. THATCHER AND N. H. WILLIAMS 474
On the Equations of Laplace and Maxwell — KARL F. HERZFELD 497
Seasonal Variations in Magnetic Storms — H. B. MARIS 504
Precision Method for Determining the Thermal Diffusivity of Solids — RICHARD H. FRAZIER 515
Slowly Contracting or Expanding Fluid Sphere and its Stability — HERMAN ROTH 525
Letters to the Editor — 530

On the Electric and Photoelectric Properties of Contacts between a Metal and a Semiconductor — J. FRENKEL AND A. JOFFÉ 530
On a General Method of Treating Uncomplete Systems in Quantum Mechanics — J. FRENKEL 532
Quantitative Study of the Quenching of Fluorescence and of the Transfer of Energy in Iodine Vapor — M. ELIASHEVICH 532
Ultraviolet Absorption Spectrum of Ozone — A. JAKOWLEVA AND V. KONDRATJEW 533
On the Entropy of the Universe — PASQUALE BARRECA 533
Molecular Configuration of N_2O — C. R. BAILEY AND A. B. D. CASSIE 534
Evidence on the Ionization Potentials of O_2 — EUGENE W. PIKE 534
Raman Effect in Water Vapor — HERRICK L. JOHNSTON AND MARGERY K. WALKER 535
Additional Evidence for an Isotope of Hydrogen of Mass 2 — WALKER BLEAKNEY 536
New X-ray Non-Diagram Line — P. A. ROSS 536
Crystal Structure of Magnesium Platinocyanide Hepthahydrate — RICHARD M. BOZORTH AND LINUS PAULING 537
Note on the Spectrum of Sb II — R. J. LANG 538
Zeeman Effect of the Third Positive Carbon Bands — R. F. SCHMID 538
Excitation of the CO_2 Emission-Spectrum in a Back Box — R. F. SCHMID 539
Specific Heat and Electronic Activation in Crystals — J. ELSTON AHLBERG AND SIMON FREED 540

Book Reviews — 541

PROCEEDINGS OF THE AMERICAN PHYSICAL SOCIETY

Berkeley Meeting, December 18–19, 1931; Minutes and Abstracts, 1–28; Author Index — 545

FEBRUARY 15, 1932

Scattering of X-rays by Polyatomic Gases — Y. H. WOO 555
Note on Woo's Paper on the Scattering of X-rays by Polyatomic Gases — G. E. M. JAUNCEY 561
Measurements in the Long Wave-Length Infrared from 20μ to 135μ — R. BOWLING BARNES 562
Direct Measurement of Mean Lives of Atomic States — H. D. KOENIG AND A. ELLETT 576
Inelastic and Elastic Electron Scattering in Argon — A. L. HUGHES AND J. H. MCMILLEN 585
New Determination of e/m From the Zeeman Effect — J. S. CAMPBELL AND W. V. HOUSTON 601
Dirac's Equation and the Spin-Spin Interactions of Two Electrons — G. BREIT 616
Investigations in the Field of the Ultra-Short Electromagnetic Waves
I. The Generator For the Production of Ultra-Short Undamped Waves — G. POTAPENKO 625

Investigations in the Field of the Ultra-Short Electromagnetic Waves
II. The Normal Waves and the Dwarf Waves – G. POTAPENKO 638
Determination of the Total Electric Polarization and the Electric Moments of Certain Organic Molecules – LOUIS M. HEIL 666
On the Stability of Certain Heteropolar Crystals – H. M. EVJEN 675
Operating Characteristics of the Electro-Optical Shutter – HAROLD W. WASHBURN 688
New Kind of e.m.f. and Other Effects Thermodynamically Connected with the Four Transverse Effects – P. W. BRIDGMAN 702
Electricity as a Natural Property of Riemannian Geometry – CORNELIUS LANCZOS 716
Velocity of Sound in Tubes at Audible and Ultrasonic Frequencies – CHARLES B. VANCE 737
Letters to the Editor – 745

Increasing the Charge Sensitivity of Vacuum Tube Amplifiers – G. F. METCALF 745
Effect of Heat on Mercury Bands – J. GIBSON WINANS 745
Resultant Electric Moment of Complex Molecules – HENRY EYRING 746
Another New X-ray Non-Diagram Line – P. A. ROSS 748
Note on the New Effect Produced by Action of X-rays on Matter – NEWELL S. GINGRICH 748

Book Reviews – 750

MARCH 1, 1932

Spectrum of Barium Hydride – W. R. FREDRICKSON AND WILLIAM W. WATSON 753
Spectrum of Strontium Hydride – WILLIAM W. WATSON AND W. R. FREDERICKSON 765
Fine Structure of the Visible Absorption Bands of Bromine – WELDON G. BROWN 777
Near Infrared Absorption Spectra of Some Halogen Derivatives of Methane – JOHN G. MOORHEAD 788
Absorption and Resonance of the Helium Infrared Lines – M. R. WEHR 796
Intensity Measurements in the Arc Spectrum of Thallium – S. E. WILLIAMS AND J. HERLILY 802
Intensities in Singlet-Triplet Bands of Diatomic Molecules – ROBERT SCHLAPP 806
Effect of Pressure upon the e.m.f. of the Weston Standard Cell – THOS. C. POULTER AND CARTER RITCHEY 816
Kinetic Interpretation of the Kelvin Relations – E. A. UEHLING 821
Hall Effect in Solid Mercury – JAMES T. SERDUKE AND THOMAS F. FISHER 831
On the Behavior of Non-Static Models of the Universe when the Cosmological Term is Omitted – RICHARD C. TOLMAN AND MORGAN WARD 835
Letters to the Editor

Diamagnetic Susceptibility of the Rare Gas Atoms According to Slater's Method – W. ROGIE ANGUS 844
Shot Effect and Electrical Breakdown in Insulators – R. M. BOZORTH AND F. E. HAWORTH 845
Isotopic Constitution of Zinc – KENNETH T. BAINBRIDGE 847

Book Reviews – 849

PROCEEDINGS OF THE AMERICAN PHYSICAL SOCIETY

New Orleans Meeting, December 29-30, 1931; Minutes and Abstracts, No. 1–64, Author Index 854

MARCH 15, 1932

Ionization by Penetrating Radiation as a Function of Pressure and Temperature – A. H. COMPTON, R. D. BENNETT AND J. C. STEARNS 873
Cosmic-Ray Particles – GORDON L. LOCHER 883
X-ray Reflection from Inhomogeneously Strained Quartz – CHARLES S. BARRETT AND CARL E. HOWE 889
Zeeman Effect of the K II Spectrum – ALBERT E. WHITFORD 898
Photoionization Probabilities of Atomic Potassium – MELBA PHILLIPS 905
Approximate Calculation of the Lower Energy Levels of the Carbon Atom – NIEL FREEBORN BEARDSLEY 913
Emission and Absorption Spectra of BaF – F. A. JENKINS AND A. HARVEY 922
Absorption Spectrum of Cyanogen Gas in the Ultraviolet – SHO-CHOW WOO AND RICHARD M. BADGER 932
Parallel Type Absorption Bands of Ammonia – DAVID M. DENNISON AND J. D. HARDY 938
Line Reflection Spectra of Solids – FRANK H. SPEDDING AND RICHARD S. BEAR 948
Temperature Shift of the Transmission Band of Silver – J. V. PENNINGTON 953
Absorption of Formaldehyde Vapor in the Infrared – JOHN R. PATTY AND HARALD H. NIELSEN 957
Surface-Electrons – J. E. NYROP 967
Tables of the Ionization in the Upper Atmosphere – E. O. HULBURT 978
Vapor Pressure Constant of Ammonia, the Entropy of Crystalline Ammonia, and the Reaction $N_2+3H_2 \rightleftarrows 2NH_3$ – T. E. STERNE 994
Some Thermal Properties of Tantalum – C. L. UTTERBACK AND L. A. SANDERMAN 1009

Letters to the Editor – – –
